

Extended Warranty Insurance

What is it?

The Extended Warranty is designed to reduce the financial impact of unexpected mechanical or electrical failure by providing cover to repair or replace most components and parts that are covered by the original manufacturer's warranty.

Why it's a good idea

Sometimes it helps to expect the unexpected. An Extended Warranty enables you to drive with confidence knowing you're prepared for almost anything that the road can throw at you, like;

- Cover in the event of unexpected mechanical or electrical failure to covered components.
- Cover for mechanical and electrical components as specified by the manufacturer's warranty book, unless noted as an exclusion in the PDS.
- Unlimited number of claims.

- Additional benefits, such as car hire, towing and locksmith services.

The maximum amount payable during the term of the cover is equal to the market value of your car at the time the cover began.

What it doesn't cover

Refer to the PDS for full list of exclusions including specific parts, some of which include:

- Component exclusions such as normal maintenance related items (for example: batteries, brake pads, radiator fluid).
- If you fail to service the vehicle, or operate the vehicle outside of manufacturer guidelines.
- Failure to minimise damage when a fault is suspected.

Example scenario

Jack acquired a used Mazda CX5 that was five years old (just outside of manufacturer warranty) and took out a four year extended warranty with his four year novated lease.

Two years into the policy cover, Jack noticed a performance reduction. A repairer inspected the vehicle and diagnosed the cause of the problem as worn fuel injectors.

So for Jack, given the total costs were below the market value of the vehicle at the time of the claim and Jack had no previous claims on the policy, his repair costs were covered in full.

Please read the **Product Disclosure Statement** for all of the product terms and conditions.
